

# Marco Antônio da Silva Filho

Full-Stack TypeScript Developer

markimkr@gmail.com · +55 62 98173-6748

## PROFESSIONAL SUMMARY

---

Full-stack developer (2019–present) specialized in TypeScript and JavaScript, with end-to-end ownership across architecture, coding, deployments, and production operations. Strong background leading development, defining scalable and maintainable architectures, and translating product needs into technical solutions. Known for clear stakeholder communication, self-management, and hands-on delivery in high-demand environments. Experience includes PRDs and pitch materials, microservices, and data-intensive integrations.

Open to relocate to Canada within 2 months; currently improving English with an 8-week study plan and preparing for IELTS (target Band 7).

## TECHNICAL SKILLS

---

- **Languages:** TypeScript, JavaScript, Dart, SQL, HTML/CSS
- **Frameworks/Libraries:** Node.js, NestJS, Express, React, Vue.js, Nuxt, Flutter, React Native, Astro
- **Platforms/CMS:** Ghost, Handlebars, Gatsby
- **Databases/Caches:** PostgreSQL, MongoDB, Redis, Elastic Search, SQL Server
- **Architecture/Infra:** Microservices, AWS, Docker, Nginx, Linux, RabbitMQ, Kafka
- **Data/Integrations:** Web crawling/ETL, Google My Business API, BigQuery, MLS, external marketplaces (Mercado Livre, Magalu, Shopee, B2W), VoIP, In-App Purchases, KYC/face recognition, SIGEF, RFB
- **Practices:** Design patterns, deployments, code review, documentation (PRD), role-based features, multitenancy, SEO-focused development

## PROFESSIONAL EXPERIENCE

---

### Self-Employed — Full-Stack Developer & Consultant (Freelance)

Dec 2024 – Present

- Lead end-to-end development, refactoring, integrations, and deployments across multiple products and domains.
- **Selected freelance projects:**
  - **Flutter App + Backend Refactor:** Refactored a Flutter app and published to iOS/Android; integrated In-App Purchases; migrated backend from Node.js/Express to NestJS + TypeScript with design patterns; added data-enrichment web crawling and new payment methods.
  - **Municipalities WhatsApp Chatbot:** Built an agent that crawls each city website, indexes content in a vector store, and serves citizen services/info via WhatsApp.
  - **Carbon Credit Platform Chatbot:** Built FAQ/triage bot and an automated report generation system for project viability with professional legal-style formatting.
  - **Online Betting Platform Audit:** Audited codebase for vulnerabilities, performance, and quality; developed KYC platform with face recognition.
  - **Vanilla Farming Chatbot:** Assistant for rural producers using vectorized agronomic documentation.
  - **Real Estate WhatsApp Chatbot (Miami):** Lead/lead-management chatbot; automated ETL for new developments/units from PDF/Word/Excel using LLM; MCP integration with a US real estate marketplace API; built admin dashboard (Leads/Properties/Agent profiles); web chat SDK; MLS integration with LLM-based data enrichment.
  - **Museum Website:** Institutional site with CRM on Ghost focused on SEO; interactive webframes for museum kiosks.
  - **Drug Leaflet Platform:** Backend with NestJS; frontend using Astro for high-performance SEO; web crawling to ingest ANVISA data.

## **Nectar — Senior Developer Level 2 (Hybrid)**

Jan 2024 – Nov 2024

- Led architecture and development of a VoIP product vertical integrated with the company's CRM.
- **Delivered:**
  - Internal and national calls, recording, transcription
  - Team management and multitenancy
  - Dynamic billing rules
  - Real-time provisioning of extensions and DIDs
  - Usage metrics and reporting
  - Role-based features
  - Audio optimization for bandwidth reduction

## **Sevencred — Full-Stack Engineer (Remote)**

Aug 2022 – Jan 2024

- Built a TypeScript API for automating FCO loan processes, designed with microservices for future fintech scale and security.
- Developed a Flutter app for loan applications.
- Implemented web crawling for public APIs (SIGEF, RFB) and ETL to normalize/load data into MongoDB.
- Built a portal/landing page using Ghost + Handlebars.
- Led a junior developer and co-led technical product decisions with a senior partner.
- **Tech:** TypeScript, NestJS, MongoDB, Redis
- **Note:** Project paused pre-MVP due to funding.

## **Ecto Digital — Full-Stack Developer (Remote)**

Oct 2021 – Aug 2022

- Migrated Google reviews ingestion from batch routines to real-time events, improving client engagement.
- Led two junior developers (code reviews, mentoring, delivery management).
- Implemented subscription system to onboard small clients and increase conversion.
- Built a templating system for comment replies to boost engagement.
- **Tech:** TypeScript, Node.js, Express, PostgreSQL, Docker, AWS, React, Google My Business API, BigQuery, Redis

## **VendorHub Sistemas — Frontend Developer (Hybrid)**

Jun 2021 – Oct 2021

- Drove UI standardization and componentization.
- Contributed to backend feature enhancements.
- Refactored a key interface to improve usability and product registration with variations.
- Implemented code review process and commit linting.
- Built a Chrome extension to analyze Mercado Livre ad performance in-page.
- **Tech:** Vue.js, Nuxt, MUI, Sass, NestJS, MongoDB, microservices, RabbitMQ, Docker, Vuex, TypeScript, Redis, AWS, external marketplace APIs (Mercado Livre, Magalu, Shopee, B2W)

## **Ecto Digital — Full-Stack Web Developer (Remote)**

Feb 2021 – Jun 2021

- Developed and improved features for a platform using Google My Business API for listings management.
- Managed deployment processes.
- Fixed and enhanced blogs built with Gatsby.
- **Tech:** React, Node.js, Express, TypeScript, PostgreSQL, AWS, Docker, Nginx, Linux

## **Collectgram Gestão de Coleções — Frontend Developer JR (Remote)**

Feb 2020 – Jan 2021

- Contributed to referral feature development.
- Built subscription CTA section.
- Fixed bugs and evolved the admin dashboard.
- **Tech:** Vue.js 2, Vuex, Nuxt, Sass, Bootstrap, Babel, Webpack

## **Collectgram Gestão de Coleções — Frontend Trainee (Hybrid)**

Jul 2019 – Jan 2020

- Developed a marketplace admin dashboard (Vue.js 2).
- Built email marketing templates with Pug and Sass on Node.js.
- **Tech:** Vue.js 2, Vuex, Sass, Bootstrap, Babel, Pug

## **EDUCATION**

---

- **Analysis and Systems Development** — coursework (not completed), 2018

Focus: Programming fundamentals (course taught in Java)

## **LANGUAGES**

---

- **Portuguese:** Native
- **English:** A2/B1 (improving); preparing for IELTS (target Band 7)

## **ADDITIONAL**

---

- **Leadership:** Team guidance, code reviews, mentoring, delivery coordination
- **Product & Communication:** Client-facing discussions, stakeholder alignment, PRD and pitch documentation
- **Relocation:** Open to relocate to Canada within 2 months
